

ÖVNING 1

Övn 1

1

Printer

grön lampa "Väntar på input"

"Waiting for input"

gul lampa "Arbetar"

"Working"

röd lampa "Papperstrassel"

"Paper jam"

Variabler: grön/green (grön lampa lyser) "green lamp is shining"

Propositional  
variables

gul/yellow (gul — " — ) "yellow — " — "

röd/red (röd — " — ) "red — " — "

på/on (printern är påslagen) "printer is switched on"

Beskriv som en satslogisk formel:

Formalize by means of a propositional formula:

"Exakt en av de tre lamporna lyser  
när printern är påslagen."

"Exactly one of the three lamps is shining  
when the printer is switched on."

$p \rightarrow (grön \wedge \neg gul \wedge \neg röd) \vee$

$(\neg grön \wedge gul \wedge \neg röd) \vee$

$(\neg grön \wedge \neg gul \wedge röd)$

1 (d)  $p \rightarrow (p \rightarrow q), p \vdash q \leftarrow \text{sequent}$ 1  $p \rightarrow (p \rightarrow q)$  Premiss2  $p$  Premiss3  $p \rightarrow q \rightarrow e \ 2, 1 \leftarrow \text{"modus ponens"}$ 4  $q \rightarrow e \ 2, 3$ 

- Always try first to make sense of the sequent!

- Always make a proof plan in your head!

1 (i)  $(p \rightarrow r) \wedge (q \rightarrow r) \vdash p \wedge q \rightarrow r$ Boxar

Boxes

1  $(p \rightarrow r) \wedge (q \rightarrow r)$  Premiss2  $p \rightarrow r \wedge E, 1$ 3  $p \wedge q$  Antagande4  $p \wedge E, 3$ 5  $r \rightarrow e \ 4, 2$ 6  $p \wedge q \rightarrow r \rightarrow i \ 3-5$ 

- Several possibilities here.

1 (j)  $(q \rightarrow r) \vdash (p \rightarrow q) \rightarrow (p \rightarrow r)$ Nästlade boxar

Nested boxes

1  $q \rightarrow r$  Premiss2  $p \rightarrow q$  Antagande3  $p$  Antagande4  $q \rightarrow e \ 3, 2$ 5  $r \rightarrow e \ 4, 1$ 6  $p \rightarrow r \rightarrow i \ 3-5$ 7  $(p \rightarrow q) \rightarrow (p \rightarrow r) \rightarrow i \ 2-6$ 

- Simplest proof strategy: syntax-driven introduction rules complemented suitably with elimination rules

Studenterna gör

(3)

1 (a)  $p \rightarrow (q \rightarrow r) \vdash q \rightarrow (p \rightarrow r)$

1 (g)  $p \vdash q \rightarrow (p \wedge q)$

1 (r)  $p \rightarrow (q \wedge r) \vdash (p \rightarrow q) \wedge (p \rightarrow r)$

(end of 1st hour)

1 (v)  $p \vee (p \wedge q) \vdash p$

Disjunktion

1.  $p \vee (p \wedge q)$  Premiss

2.  $p$  Antagande

3.  $p$  Copy 2

4.  $p \wedge q$  Antagande

5.  $p$   $\wedge e, 4$

6.  $p$   $\vee e 1, 2-3, 4-5$

2 (a)  $\neg p \rightarrow \neg q \vdash q \rightarrow p$

Falsum

Contradiction

1.  $\neg p \rightarrow \neg q$  Premiss

2.  $q$  Antagande

3.  $\neg p$  Antagande

4.  $\neg q$   $\rightarrow e 3, 1$

5.  $\perp$   $\neg e 2, 4$

6.  $\neg \neg p$   $\neg i 3-5$

7.  $p$   $\neg \neg e 6$

8.  $q \rightarrow p$   $\rightarrow i 2-7$

Alt.

6.  $p$  PBC

- Contradiction as a formula ( $\perp$ ) represents syntactically the fact that the formulas above cannot be simultaneously true.

Studenterna gör:

4

$$3a \quad \neg p \rightarrow p \vdash p$$

$$3b \quad \neg p \vdash p \rightarrow q$$

$$2b \quad \neg p \vee \neg q \vdash \neg(p \wedge q)$$

$$3f \quad p \rightarrow q \vdash \neg p \vee q$$

$$\neg p \rightarrow p \vdash p$$

PBC

$$3a \quad 1. \quad \neg p \rightarrow p \quad \text{Premiss}$$

$$2. \quad \neg p \quad \text{Antagande}$$

$$3. \quad p \quad \rightarrow e \ 2, 1$$

$$4. \quad \perp \quad \neg e \ 2, 3$$

$$(5. \quad \neg \neg p \quad \neg i \ 2-4)$$

$$6. \quad p \quad \neg \neg e \ 5 \text{ (PBC 2-4)}$$

Indirect proof:

You assume the opposite of what you believe to be true, and try to derive a contradiction.

$$\neg p \vdash p \rightarrow q$$

$$3b \quad 1. \quad \neg p \quad \text{Premiss}$$

$$2. \quad p \quad \text{Antagande}$$

$$3. \quad \perp \quad \neg e \ 2, 1$$

$$4. \quad q \quad \perp e \ 3$$

$$5. \quad p \rightarrow q \quad \rightarrow i \ 2-4$$
